

On Friday, March 23, 2007, the Mission Springs entrance bridge on Lockhart Gulch Road, while under construction for repairs, was closed based upon the Engineer's report submitted to the County and an inspection by the County Engineer. It is unknown at this time how long the bridge will be closed to traffic.

In the meantime, a secondary access road through our youth camps, Wild Oak and Frontier Ranch, has been graded and paved in order to provide access to guests and residents to the Conference Center.

At the fork of Lockhart Gulch Road and Nelson Road, take a right on Nelson Road and continue to Wild Oak (627 Nelson Road). Turn left into the Wild Oak driveway. (See map for details)

The new access road has a steep grade and is a one-way road controlled by a traffic light at both the top and bottom of the hill. Caution should be taken when using this new access road and all informational and directional signs should be strictly adhered to.

We recognize the inconvenience this creates and express our sincere apologies. Mission Springs is ready and willing to assist you as needed until this matter is resolved. Please call the Mission Springs office with any questions you might have at 831-335-9133.
